

Nevada Division of State
Parks

Valley of Fire State Park

Creating a New Vision

NV State Parks in partnership with the
National Park Service;
Rivers and Trails Assistance Program
and the Land and Water Conservation Program

The purpose of this effort is to update the 1990 long-range development plan for Valley of Fire State Park. We encourage the public and other agencies to play an important and genuine role in determining the management strategy for recreation while protecting the valuable and unique resources in Valley of Fire.

Valley of Fire is Nevada's oldest and largest state park, dedicated in 1935. This plan will result in management direction for recreation and natural resource protection for over 42,000 acres of unique, sensitive desert landscape.

Getting Started...Internet Survey

We are kicking off the planning process by posting park information, issues and suggestions for management on the Park website:

<http://www.parks.nv.gov/masterplans/status.htm>

On this website we have described the issues that the park is facing today and ask for input on potential management strategies, ideas and solutions.

Our goal is to reach as many people as possible in the next few months; bringing together ideas from subject experts, special use groups, and community members to develop ideas on how to improve Valley of Fire State Parks' natural, archaeological resources and recreation opportunities.

In order to be financially efficient as possible, the Park is utilizing the internet to disperse and collect information for this plan as much as possible. Therefore, if you would like to be added to the distribution list to receive updates and more details, please send your name and e-mail to:
