## Part 2 Survey Regional Maps

### The Outdoor Recreation Public Survey

Part 2 – How and Where We Recreate asked respondents to identify where they recreated across the state, and specifically, to identify what outdoor recreation activities they participated in across the five different regions of the state during the previous year. There were 720 survey respondents who provided this information.

There are two maps for each region:

- **Map 1** indicates where respondents who live in Region 1 go to recreate, and for what specific outdoor recreation activities. We refer to this as the Region 1 “Out” map.
- **Map 2** indicates which respondents from across the state go to Region 1 to recreate, and in what specific activities they engaged in Region 1. We refer to this as the Region 1 “In” map. The numbers next to the activities listed indicate the number (not percentage) of survey respondents who participated in those specific activities. Respondents were allowed to select more than one activity per region.
